1. Start coding with files in **Submit** folder. Follow assignment instructions on Canvas.
2. Test classes, one class at a time
    a. In this assignment if you just run TestsAll.java from **Test** folder, compilation will fail.
    b. For each class you are working on:
        i. When you are ready to test, copy class file into the **Test** folder.
        ii. Open TestAll.java. Comment out all test method calls except the one for the class you are testing. All test calls are clearly marked in code.
        iii. Run TestAll.java
        iv. See results in _gradingLog.txt file in Test folder.
3. To submit your work
    a. Zip Submit folder to create a .zip file. You can name this file any way you want.
    b. Submit zipped folder into Assignment drop box on Canvas
    c. Make sure to submit ONLY Java source files listed in Assignment description. The assignment will not be graded when
        i. files are named incorrectly
        ii. not all required files are present in submission
        iii. Source code does not compile
        iv. your .zip has extra subfolders
